

# Processor

Compact cremation machine for processing the ash remains after a cremation.

## Pet Processor

The Addfield Pet processor is the ideal accessory to accompany any pet cremation business. Constructed from long lasting, rugged mild steel the processor rapidly reduces all bone fragments left behind after the cremation process. Grinding them down into a fine, presentable ash in as little as 2 minutes. The result is a more visually appealing remains format for the operators to return to the pet owners.

The processor has a dust tight seal on the drum and the lid which prevents leakage and a robust 6mm thick, mild steel blade.

The advanced remains processing system is dust free and shuts off automatically once the process has finished.

## Ergonomically Friendly

Once completed, it is important to leave the ash to settle in the sealed chamber for 5 minutes before emptying into the ash bowl, using the ergonomically friendly pivoting arm.

The finished remains are a fine ash which makes it ideal for all crematoriums that complete individual cremations. A larger Equine cremulator is also available

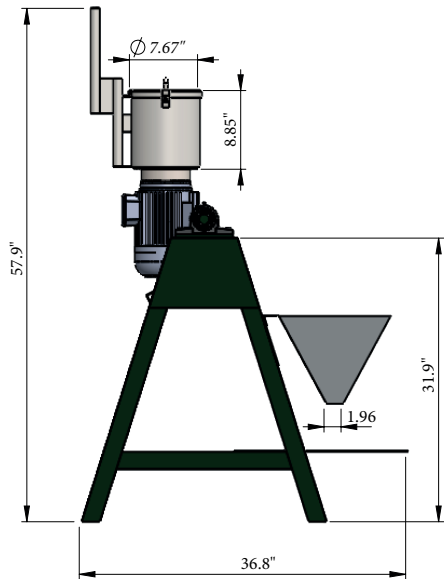

### Processor Specification

|                                   |        |
|-----------------------------------|--------|
| External Length (inches)          | 36.8   |
| External Width (inches)           | 12.8   |
| External Height (inches)          | 57.8   |
| Chamber Volume (ft <sup>3</sup> ) | .21    |
| Weight (Approx. lbs)              | 132.25 |

\*We reserve the right to change the specification, dimensions and quality of materials from time to time, so long as the alteration is minor or an improvement to the said product.
